

SOFTWARE DEVELOPER

Advertised by Gazelleware

Part Time/Casual

in Camperdown

Closes 30/03/2012

Suitable for students in Double Degrees - Engineering/Commerce, Double Degrees - Engineering/Science, Double Degrees - Science/Commerce, Engineering - Software, Information Technology, Economics and Business - Business Information Systems.

Gazelleware is a start-up enterprise software company. We design and implement business development applications for fast-growth companies. Agile is exciting, successful and effective in applying software development. We are looking to use the Agile approach in areas beyond software development.

Gazelleware is currently seeking a bright and talented university student to join our team as the Lead Software Developer. This presents an amazing opportunity to balance your study while gaining exposure into the world of enterprise software. Remuneration is negotiable and we offer our developers share-equity. Induction and training will be provided.

Key Responsibilities

- Design and development of new software products
- Programming using either C++/Java or Django/Python
- Develop web-based graphical user interfaces
- Design systems testing procedures

Key Skills and Requirements:

- Completed or be studying towards an IT related or engineering degree
- Ideally in your 3rd or Honours year
- Project experience in developing graphical user interfaces
- Strong analytical and problem solving skills

Commercial software experience is preferred but not essential. If you possess these skills and requirements we want to hear from you. Please email your resume, cover letter and academic transcript to recruitment@gazelleware.com
